

# Easy Web Design Errata

## ***Chapter 2: Creating and Shaping Web Text***

Pages 30, 40, 41 and 43

All references to Figure 2-9 should reference Figure 2-8, there is no Figure 2-9.

## ***Chapter 8: Demystifying Basic CSS and XHTML***

Page 223

In Figure 8-14 (shown corrected below), the following code:

```
#centercolumn {
```

```
top: 165;
```

should match the code shown in step 4, like this:

```
#centercolumn {
```

```
top: 165px;
```

```
@import url(styles_presentation.css);

body {
  margin-top: 0px;
  margin-left: 25px;
  margin-right: 25px;
}

p, h1, h2, h3 { margin: 10px 20px 20px 20px; }

#leftcolumn {
  position: absolute;
  top: 180px;
  left: 25px;
  width: 150px;
}

#centercolumn {
  top: 165px;
  margin-left: 157px;
  margin-right: 157px;
}

#rightcolumn {
  position: absolute;
  top: 180px;
  right: 25px;
  width: 150px;
}
```

The screenshot shows a WordPad window titled "styles\_main.css - WordPad". The code defines a multi-column layout. A callout box points to the `#centercolumn` rule, which is currently using a hash selector. The code includes rules for `body`, `p, h1, h2, h3`, `#leftcolumn`, `#centercolumn`, and `#rightcolumn`.

**Page 239**

In step 2, the code shows

```
leftbar_title {
```

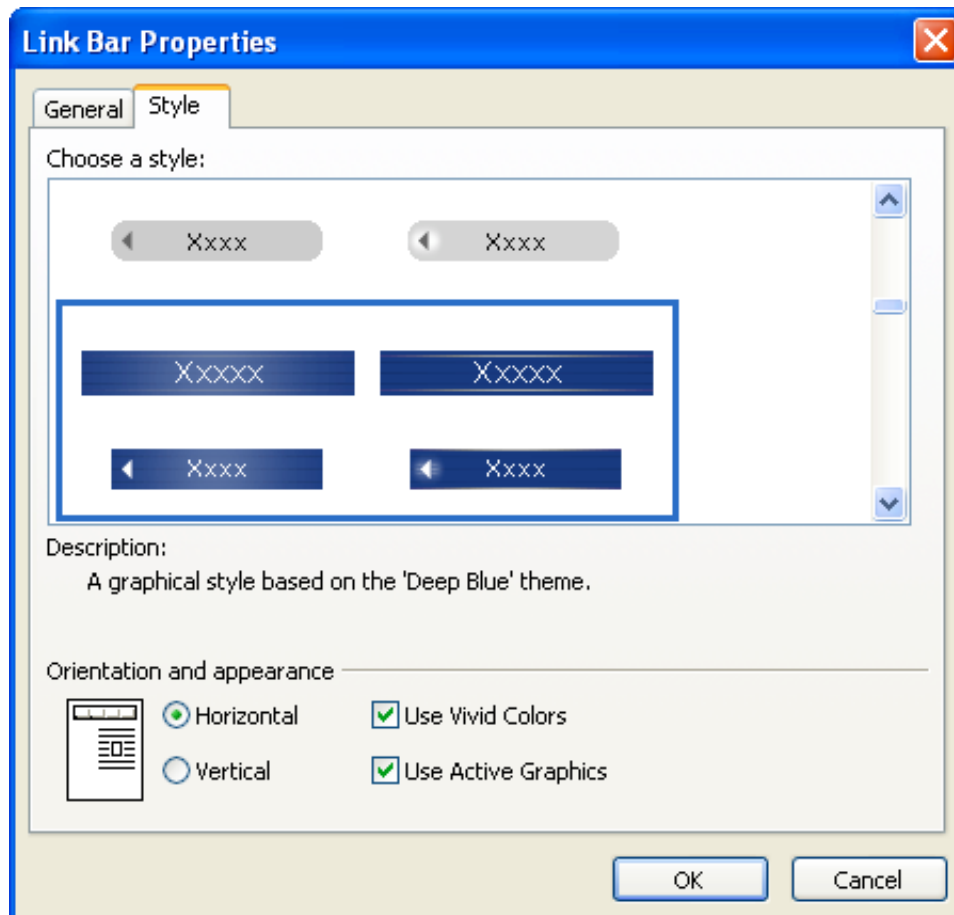

This line should be preceded by a period, like this:

```
.leftbar_title {
```

## Chapter 11: Going All Out with FrontPage

Page 350

Figure 11-13 should appear as the following (the current figure repeats Figure 11-12):

Page 351

In **step 1**, the text

...click the index.html tag...

should refer to the *tab* instead of the *tag*, like this:

...click the index.html tab...
